Jovan Miljkovic

`Full Stack Web Dev`

Content

Introduction

Get to know me

Hello. I'm Jovan and I'm a creative and passionate programmer. Most of my time is spent designing and building digital products.

You can call me many thing, web developer, web designer, software developer but I consider my self an open-minded programmer. Throughout my 3 years of experiences in the programming industry I have changed many hats. However what prevails most of the time is my artistic and developing side. But I have learned that I adapt and learn new skills easily. Fun fact I know 3 languages fluently Greek, Serbian and English.

Biography

Loading...

My journey as a designer started when I was 10 and I enrolled in art classes.

This need for artistic expression later took me to the world of Photoshop and Photography.

When I turned 14 I realised that I something that I create can be on the internet which for me meant that I can express myself to more people.

I wrote my first line of HTML and that turned out to start my love for programming. By the time I was 16 I had learned most of the ins and outs of HTML, CSS and and simple web development.

When I turned 18 I enrolled for a bachelor degree in Software and Data Engineering. This course has helped be broaden my digital horizons, widen my range of knowledge and gather experiences through various disciplines.

I'm excpected to get my degree by 2024

Experiences

Since I am still 19 I haven't had the chance of starting my career yet. Most of my experiences are online and personal still. I have always loved working on projects that I'm passionate for.

Some of my favourite projects and the software used:

Web Chat App
ReactJS, CSS, JavaScript, Python

Barbershop Reservations Website
HTML, CSS, JavaScript, Python

Personal Portofolio Website
ReactJS, CSS, JavaScript

Mountaineering Club Website
HTML, CSS, JavaScript, BootStrap
